Windows

VPN Stuck on “Connecting” in Windows 10: How to Fix It

The symptoms are as follows: you select a VPN connection in the system tray and click “Connect”. The “connecting” status goes on indefinitely without ever establishing a successful connection. The connection attempt is silently closed, and after you reopen the system tray you’re again offered the “Connect” option.

How to make it works:

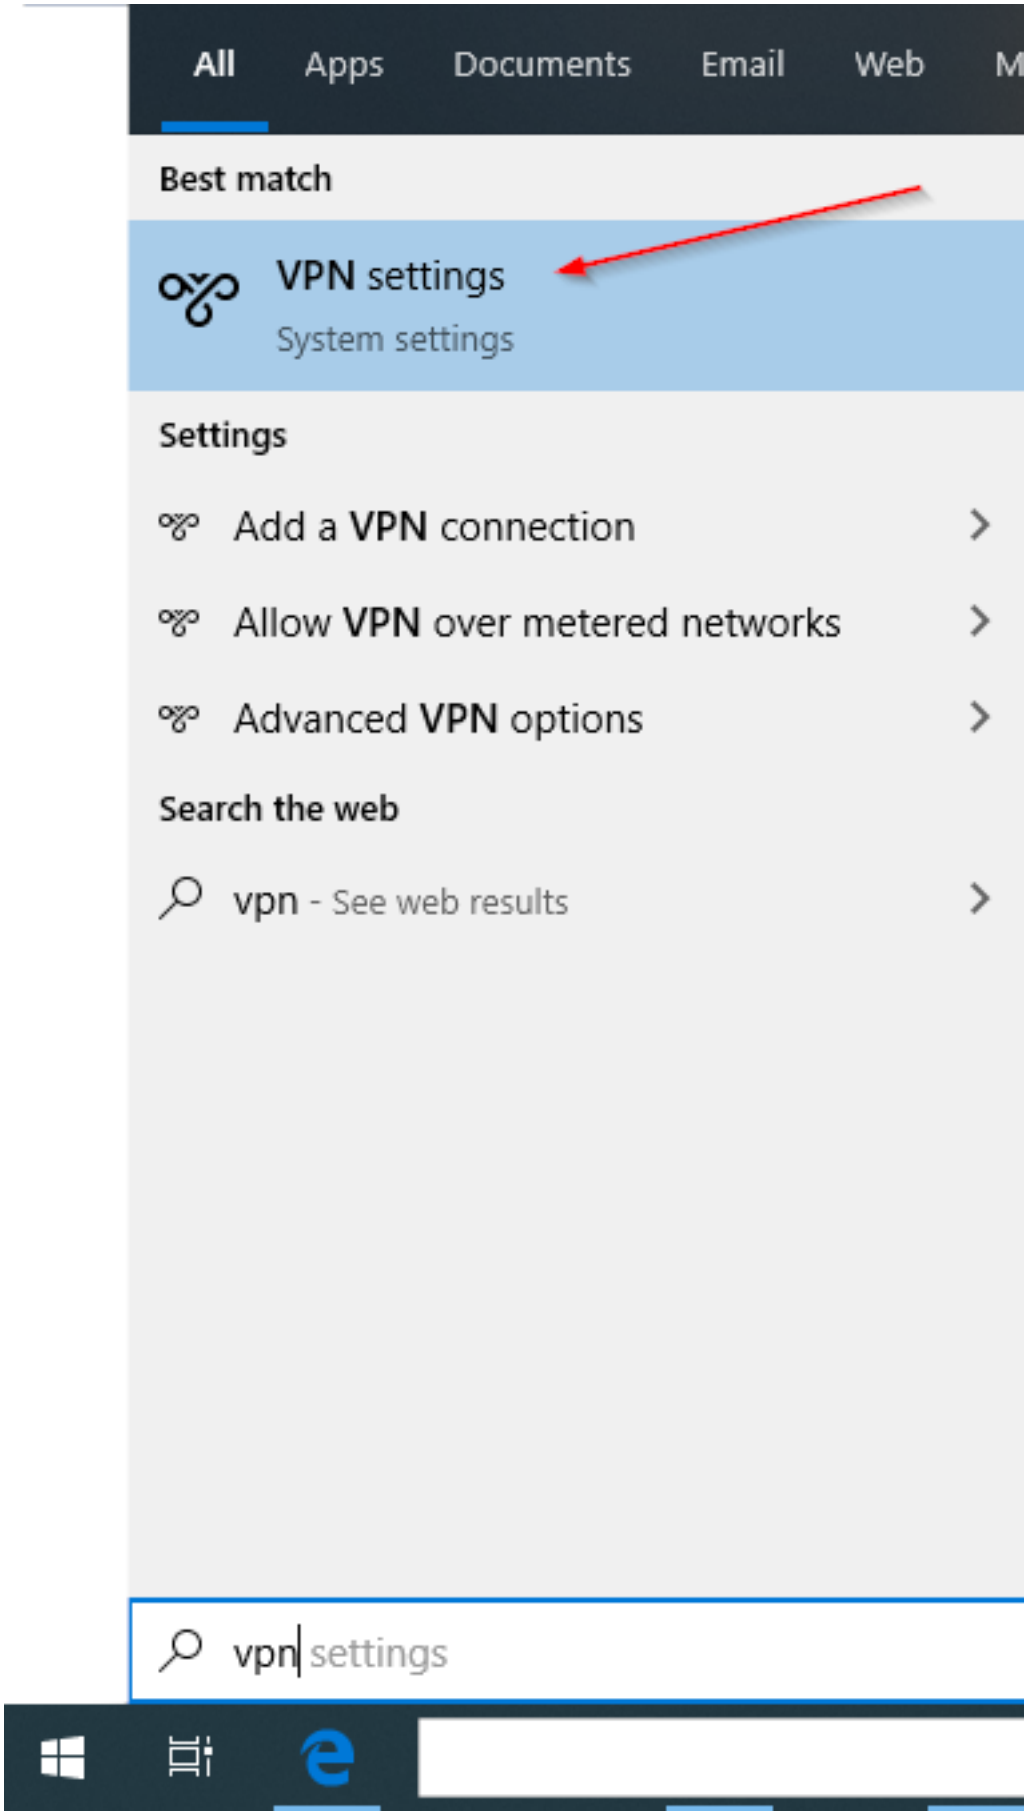

- **Click on Windows icon**

- **Type VPN then click on VPN Settings**
