Laravel

Run php artisan command by clicking on a link-button

```
Route::get('make-migration', function () {
Artisan::call('make:migration', [
'name' => 'create_invoices_table',
'--create' => 'invoices',
]);

return 'Create invoices migration table.';
});
```

```
Route::get('migrate', function () {
Artisan::call('migrate');

return 'Database migration success.';
});
```

```
Route::get('mcv', function () {
Artisan::call('make:model Customer -mcvr');
return view('welcome')->with('success','Completed with success!');
})->middleware(['auth', 'verified'])->name('mcv');;
```
